

Superintendent's Compensation and Benefits

The Board of Education is committed to providing its superintendent with compensation for his/her service that is commensurate with professionals serving in similar positions in area communities.

In addition to recognizing that this top administrative leader is denied by law from being represented by a union, the Board also recognizes that this staff member is a front line representative of the Board and deserves to be rewarded for his/her special efforts on behalf of the Board, students, staff, parents, and the community.

The basis of compensation is described in the Superintendent's Contract.
